

AXIAL INSTALLATION HD PACKER

The **Axial Installation (AI) HD Packer** is a heavy-duty service packer ideally suited for all types of squeeze cementing, formation fracturing, high pressure acidizing, etc. It is a large opening compression set packer with hydraulic button-type hold down. It is set and unset with simple up and down motion. This motion is controlled with a continuous J-slot so multiple settings are possible. This packer withstands high pressure from above or below and uses a 3-element packing system, J-slot, and a drag block mechanism for easy setting. The packer has a built-in unloader which circulates across the hold down buttons to improve retrievability and run in performance.

Special Features

- Heavy duty design
- No rotation at surface
- Built-in unloader
