D&L ON/OFF TOOL

D&L Oil Tools is transitioning to a new, non-welded version of the DT-2 On/Off Tool. The new, fully machined, weld-free design is fully compatible with D&L's existing DT-2 Stingers and On/Off Tool Top Subs. Utilizing a common J-body among all casing sizes (per connection / stinger size) translates to less inventory items for customers to stock. Interchangeable milling shoes will soon be available in all casing sizes to quickly and easily convert from one size to another.

Special Features

- Fully machined, weld-free design
- Common J-body = less inventory to stock
- Improved manufacturability = better availability
- Compatible with existing D&L DT-2 tools and accessories

Product Specifications

Thread Connection/ Stinger Size	J-body/Cover Part Numbers	Casing Size	Shoe Part Number	Shoe OD (In.)	Part Number
2-3/8" EUE	51545340A/ 51545340B (3.656 OD)	4-1/2" (15.1#)	51544340C	3.656	51544
